

DOWNTOWN MIPS

Trekking | Touring | City

MET Downtown Mips is a truly modern touring helmet. As flexible as your free-time, it's ready for a weekend trek or the daily bicycle lane.

The MET Downtown Mips stands out for its versatility. The internal air-channeling and the large number of vents makes it as ventilated as a road helmet. The visor gives a dynamic MTB style to a classic and elegant design, being removable leaves you free to choose. A sporty look to be confident on the road.

Thanks to its unmistakable MET fit, it delivers a very special kind of riding pleasure. The 360° head belt ensures that there will be no pressure points on the skull and the overall light weight does not make its presence felt.

Featuring the MIPS-C2® rotational management system, the Downtown is able to slide relative to the head in the case of a crash, redirecting damaging rotational motion. MIPS is engineered to add extra safety to the standard construction of helmets in case of certain impacts. The MIPS Brain Protection System (BPS) is attached inside the helmet, between the comfort padding and the EPS.

FEATURES

- In-mould polycarbonate shell with EPS liner
