

ECHO MIPS

MTB | Trail | E-MTB

The MET Echo Mips is an entry-level MTB helmet high in quality and protection. It's the perfect choice for those who are just beginning their adventures on the trails.

The construction of the helmet offers the same technology and safety as helmets higher up in the range. We've increased the coverage around the back of the head, which is especially in need of protection.

Featuring the MIPS-C2® brain protection system, the Echo is able to slide relative to the head in the case of a crash, redirecting damaging rotational motion.

FEATURES

- In-mould polycarbonate shell with EPS liner
- Fully polycarbonate wrapped EPS liner to enhance durability
- Extended Head Coverage for deeper head protection
