

# MOBILITE

## Urban | E-bike | Commuting

Special in every way. That's the new MET Mobilite, with a contemporary design and a casual look. It's made to leave conventions behind.

The MET Mobilite is exceptionally safe and packed with all the features needed in the city. The helmet's fastening clip is covered with a soft padding. It has an anti-insect net embedded into the front vents to protect you from unexpected bites. Last but not least we've designed a custom LED light which snaps in and out the rear vent to ensure you to be visible on the side of the road.

The MET Rear LED Light attaches tool-free to your helmet vent and provides a fixed and blinking light mode to keep you visible. It features 4 LED spotlights and has a battery lifespan up to 40 hours of use.

One of the hallmarks of the Mobilite is its incredible comfort. The 360° head belt ensures that there will be no pressure points on the skull and thanks to its internal shape it will go unnoticed on your head. The Safe-T Mid retention system can be micro-adjusted to achieve the perfect fit and has a soft padded neck support. If you need extra room for your head the size chart goes up to the XL.
