

TERRANOVA MIPS

MTB | Trail | E-MTB

MET Terranova MIPS it's designed for trail and e-mtb riding. The construction and fit are inspired by the award-winning Roam, guaranteeing optimal comfort. The increased head coverage ensures a higher level of protection around the two most sensitive brain areas: the back and the temples.

We've worked closely with MIPS to achieve highly efficient ventilation and at the same time enhance the helmet's safety features. Featuring the MIPS-C2® brain protection system, the Terranova is able to slide relative to the head in the case of a crash, redirecting damaging rotational motion.

The visor is tool-free adjustable and flex injected to bend when there is an impact against it. This unique feature helps to manage extra rotational forces transferred to your neck in a crash. The Terranova MIPS also features two dedicated ports to securely dock sunglasses while climbing or resting.

The Terranova MIPS is well ventilated and remarkably comfortable. The 360° head belt of the MET Safe-T DUO retention system ensures that there will be no pressure points on the skull and makes the helmet perfectly stable on the head on rugged terrains.

FEATURES

- In-mould polycarbonate shell with EPS liner
- Fully polycarbonate wrapped EPS liner to enhance durability
- Extended Head Coverage for deeper head protection
- Exceptionally comfortable and secure on the head thanks to refined internal shape
- MIPS-C2® Brain Protection System extra protection against certain impacts
- MET Safe-T DUO Fit System
- 360° Head belt, Vertical adjustment to maximise adjustability
- Adjustable and flexible injected visor to avoid extra rotation of the neck in case of a crash
- Hand washable comfort pads
- Straps with adjustable divider leave you with an individual fit
- Reflective rear decals to enhance visibility in low-light conditions
- Sunglasses ports to securely dock sunglasses when climbing or resting
- 17 Vents, Internal engineered air channeling to improve ventilation and comfort
